

ORALITE® V98

REPOSITIONABLE PRISMATIC REFLECTIVE SHEETING

PRODUCT INFORMATION

ORALITE® V98 is the brightest and most effective prismatic reflective film available in the market today. It is widely used on emergency vehicles for its superior visibility and brightness.

With the GERBER EDGE® thermal printing technology, this film can be effortlessly printed. A roll of white can be used with over ten GerberColor™ transparent foil colors, enabling you to easily create your own custom reflective colors. For instance, Gold V98 reflective can be created by printing GCT-105 Trans-Gold on top of the reflective material, and the same approach can be followed to create conspicuity markings with GCT-643 Trans-Red.

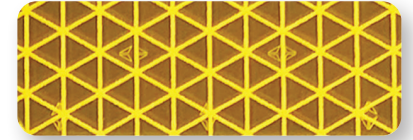

You can also personalize this product by adding watermarking with your brand logos and identification numbers. With confidence, we assure you that you will be extremely satisfied with the quality and performance of this product.

NOTABLE QUALITIES

- High performance vinyl film
- Warranty | 5 years
- Conforms to vehicle contours & curves
- No edge sealing required
- Withstands power washing and resists edge lift
- Single layer prismatic construction with repositionable adhesive
- Maintains reflectivity after impact
- Colors meet and exceed NFPA 1901 recommendation for Chevron Striping

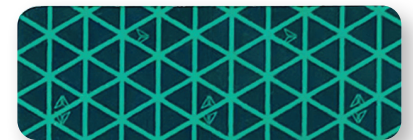

15 White

18 Yellow

12 Red
