POLI-TAPE™ 160

## Poli-Tape™ Premask Application Tapes

Reliable Transfer Solutions for Designers & Installers  
Now available at [www.shopGMS.com](http://www.shopGMS.com)

Whether you're transferring layered vinyl, stacking decals for shipment, or installing detailed graphics on storefronts, equipment or vehicles—Poli-Tape™ is the professional's choice for clean, efficient application.

### Poli-Tape™ 130 – White Paper Tape

The all-purpose premask every shop should have.

- Smooth milky white paper makes alignment easy
- Flat-lay technology—no curling or tunneling
- Tears cleanly, with minimal adhesive webbing
- Maintains shape in moist or humid conditions
- Works well with heat transfer materials under a heat press
- Great for general signage, decals, and cut graphics

### Why Designers & Installers Choose Poli-Tape™:

Exceptional control and registration accuracy.  
Reliable in shop and field conditions.  
Trusted for use with plotter-cut vinyl and specialty films.

### Poli-Tape™ 160 – Clear Embossed Film

For installations that demand visibility and precision.

- Crystal-clear embossed film for detailed positioning
- Stays flat when stacked or rolled for shipping
- Withstands humidity without losing dimensional stability
- Ideal for window graphics, retail decals, and vehicle lettering

### Available in Bulk Cases or Single Rolls

Order now in a wide range of widths to match your workflow.  
Stocked and shipping from [www.shopGMS.com](http://www.shopGMS.com)

Need help selecting the right tape? The GMS Team is here to assist.

# POLI-TAPE

## Poli-Tape™ 130 White

**Poli-Tape 130** application tape based on a special impregnated paper with low tensile elongation and high wet strength.

Suitable for transferring self adhesive letters produced from cast and calendered PVC colored films according to CAD/CAM techniques.

### Properties to be emphasized are the following:

- The natural rubber adhesive guarantees an excellent adhesion on PVC films because of the relatively high coating weight.
- The impregnated carrier paper shows an excellent stability of shape, with no curl even under moist conditions.
- Based on the tape translucence, the alignment – even of small letterings and logos – is simplified.
- The application tape can be rewound easily from the roll.

## Poli-Tape™ 160 Clear

**Poli-Tape™ 160** transparent application tape based on a single sided embossed Polypropylene film, with excellent flatness.

It is dimensionally stable, easy to unroll, position and will not stretch or curl.

Suitable for transferring self adhesive signs, logos and lettering produced from cast or calendered CAD/CAM plotter films with matte or brilliant surface.

### Properties to be emphasized are the following:

- As the tape does not curl, wrinkling is avoided during lamination of large lettering. The film adjusts perfectly to the surface.
- The plasticizer resistant adhesive guarantees a strong initial tack to all types of vinyl films. The application tape is easily removed without leaving any residue, even after being left for a period of time.
- Suitable for wet application.
- The film can be torn transversally, which facilitates handling.
- The embossed surface allows the film to be easily unrolled without any accumulation of electrostatic charging.

This is a non-hazardous product under EU and transportation regulations. It does not release dangerous substances under normal use. An SDS is available upon request to comply with REACH Regulation (EC) No. 1907/2006. Dispose of in accordance with local and national guidelines.
