

Do you want to be **more productive,** **cut costs,** and **save time** with your Gerber Edge®?

That's easy! Upgrade your Gerber Roll Holder to
the GMS Heavy-Duty Electric Rewinder

EDGE FX without GMS Rewinders

EXPERIENCE TRULY UNATTENDED PRINTING.

When your GERBER EDGE begins printing, the GMS Heavy-Duty Electric Rewinders keep constant tension on your materials while rewinding when the EDGE feeds left or right. This prevents your materials from touching the table surface or creating folds. Using a rewinder on each side of the printer eliminates the need for constant attention and frees up your time to accomplish more. GMS Heavy-Duty Electric Rewinders quickly pay for themselves by preventing the costly waste of time and materials. Rewinders are also bi-directional. With a simple twist of the dial, you have the ability adjust the pull/torque for a variety of materials such as Magnetic, Lexan®, PVC-10, vinyl, and other specialty materials.

- **Save Time and Raise Productivity**
- **End Printer Jams & Folding**
- **Prevent Dirt & Dust Spots**
- **Eliminate Wasted Materials**

the GMS Heavy-Duty Electric Rewinder

Specifications

Alignment Frame for the GMS Heavy Duty Rewinders for Edge 1 & 2:

Width= 32.25 in, Depth=24.5 in, Height= 5.125 in

Weight= 10 pounds

Alignment Frame for the GMS Heavy Duty Rewinders for Edge FX:

Width= 32.25 in, Depth=24.5 in, Height= 6.25 in

Weight= 11.5 pounds

Rewinder:

All rewinders come with a 5 year limited warranty.

Width = 7 in, Depth = 15 in, Height = 11 in

Weight = 18 pounds each

U.S. power supply for use with Rewinder Model# HDR-2 only:

Model NO: PS-1240

INPUT: 120VAC 60Hz

OUTPUT: 12VAC 3300mA 40W

European power supply for use with Rewinder Model# HDR-2 only:

Model NO: 4515

INPUT: 100-240V-1.5A MAX 50/60Hz

OUTPUT: 15V 3.0A

Optional High Torque power supply for use with Rewinder Model# HDR-2 plus only:

Model NO: PS-65

INPUT: 100-240VAC 50/60Hz

OUTPUT: 19VDC4A

Five Year Limited Warranty
